**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-17 and 19-25 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 4,836,591 to Faust.

Faust discloses a cable 226 connected to a remote pull mechanism 36 and a latch 22 with an intermediate cable pull mechanism 264 fixedly attached to the cable projecting on opposite sides 268, 276 of the cable. The intermediate cable pull mechanism causes movement of the cable ends, the latch, and the remote pull mechanism. The cable is sleeved between the intermediate cable mechanism and each end of the cable by two sleeve portions abutting two abutments 246, 248 forming part of a housing open on one side. The housing is fastened to an adjacent structure 242. The latch and remote cable pull mechanism move relative to the adjacent structure, which is fixed relative to a body 10 and boot lid 12 of a vehicle, and the intermediate pull mechanism is accessible from within the boot compartment 16. The mechanism is fixed relative to the trunk lid and the vehicle body while the trunk lid is closed, and is movable relative to each.

***Response to Arguments***

3. In response to applicant's argument that the actuator of Faust is not located in a trunk and not intended to be actuated by hand, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the hood compartment of Faust is a trunk as broadly claimed.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3682

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
